

# PRODUCT BULLETIN

FOR IMMEDIATE RELEASE

[oldcastleinfrastructure.com](http://oldcastleinfrastructure.com) | (800) 735-5566

**Publish Date:** July 26, 2019  
**Effective Date:** July 26, 2019  
**Subject:** Hardware Improvement on Oldcastle Christy® Traffic Boxes  
**Products Affected:** Christy® B-Series Traffic Boxes

## Description of change:

To better serve customers and continuously improve our products, Oldcastle has made a change to the hardware on the line of Christy® Traffic Boxes. Hardware has been improved from a 3/8" stainless steel bolt to a 1/2" stainless steel bolt. This change has been made to increase the safety factor with these traffic-rated enclosures. Upgrading the hardware improves both tensile strength and shear strength of the bolts, resulting in a better performing product.

Effective immediately, this change has been made with our B1324 and B1730 models and new SKUs listed below. B1730 models with updated hardware are available now, and B1324 models with updated hardware will be available in early to mid-September. Once inventory of the 3/8" hardware has been depleted, the current SKUs will become inactive. As part of continuous improvement, over time, we will upgrade other models in the family (B1017, B2436, B3048). See chart below for the cross-referenced part numbers, converting from 3/8" to 1/2" hardware.

Christy® B1730 Traffic Box			
Current SKU	Current Description	New SKU	New Description
1000295	Box, B1730 Utility H20 Load IMPT (3/8" Hex bolt)	1000297	Box, B1730 UTILITY H20 Load IMPT (1/2" HEX BOLT)
1000296	Box, B1730 Utility H20 Load DOM (3/8" Hex bolt)	1000298	Box, B1730 UTILITY H20 Load DOM (1/2" HEX BOLT)
-	-	1000299	Box, B1730 UTILITY H20 Load IMPT (1/2" PENTA BOLT)
-	-	1000301	Box, B1730 UTILITY H20 Load DOM (1/2" PENTA BOLT)

  

Christy® B1324 Traffic Box
